

FORCEFIELD TECH 3 BASE LAYER

SHIRT/PANTS

Base layers might not be the sexiest of kit (literally and metaphorically) but it's vital stuff when it comes to riding comfort. In cooler temperatures, a good base layer provides an extra barrier against the chill, and when the mercury rises it'll wick away moisture, cooling you down and helping protect your riding kit from the sweat, grime, and stinky odours of a proper hard ride.

British firm Forcefield has revamped its excellent base layer options for 2022 with the new Forcefield Tech 3 range. It boasts a re-engineered formulation with Becool and Dryarn smart materials and the latest 'seamless' loom production methods. The result is even more comfort and performance from the increased breathability and wicking performance, as well as new compression-fit areas to reduce muscle fatigue.

RRP: £70 (shirt); £50 (pants)
